

ANALYTICAL, ENVIRONMENTAL
& GEO-CHEMISTRY
RESEARCH GROUP

AMGC Seminars

October - December 2018

Seminar room 7th floor (G building)

Thursday October 4 – 4 PM

Stephanie Van Rysseghem: **Introduction to PURE database**

Thursday October 18 – 4PM

Inga Tarasenko: **Environmental effects of volcanic eruptions: a multidisciplinary study of tephra impacts on plant and soil**

Tuesday October 30 - 4PM

Chunyang Zhou: **Two dimensional profiling of sulfide and metals in sediment porewater**

Camille Gaulier: **The leaching of two Northern France slag heaps: diagnosis of the surrounding aquatic environment and impact assessment**

Thursday November 15 - 4PM

Kim Croes: **Health effects related to fine dust exposure**

Thursday November 29 – 4PM

Sietze de Graaff: **Making sense of destruction: Geochemistry of Chicxulub impact melt rocks and granitoid target recovered during IODP-ICDP Expedition 364**

Sam Poppe: **Magma propagation through the Earth's brittle crust: unraveling emplacement timing of dyklets and calcite veins in carbonate mudstones of Hovedøya Island, Oslo Fjord, Norway**

Thursday December 13 – 4PM

Ludovic Ferriere: **A new tektite strewn field discovered in Uruguay**
